### DETAILED ACTION

Claims 1-21 are presented for an examination.

#### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 21 are drawn to object-oriented database structure processing, classified in class 707, subclass 103Y.
  - II. Claims 11, 12, 16 and 17 are drawn to pattern matching, classified in class 707, subclass 6.
  - III. Claims 13 and 14 are drawn to object-oriented database structure processing, classified in class 707, subclass 103Y.
  - IV. Claims 15 and 20 are drawn to distributed access, classified in class 707, subclass 10.
  - V. Claims 18 and 19 are drawn to object-oriented database structure processing, classified in class 707, subclass 103Y.
2. Inventions I - V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case inventions I, III and V each have separate utility such as any integrating data systems. Invention II has separate utility such as data matching systems. Invention IV has separate utility such as distributed processing systems.

Art Unit: 2171

Note, only one Invention may be elected for examination.

3. Because these inventions are distinct and search Groups I - V are not required to be simultaneous, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Carl I. Brundidge on 8/4/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
